

Integrity Clubs

Mobilising students to become champions of Integrity

- ❖ Students (ages 14-18) have proven themselves to be extremely **positive agents of change**, exhibiting a motivation to improve the services and projects that are delivered to their communities.
- ❖ Teaching youth the benefits of **acting with integrity** and the skills to practice and demand it in real-life situations gives them the confidence to always choose integrity over corruption throughout their lifetimes.
- ❖ We train students in our **CIB approach** through **Integrity Clubs** in schools, adapting materials in order for it to be relevant, interesting, and enabling them to become monitors with **DevelopmentCheck**.

Integrity Clubs- how they work

As part of the CIB cycle

- ❖ Between 2010 and 2017 we trained 4,615 students in 186 Integrity Clubs across Afghanistan, Kenya, Nepal, the Democratic Republic of Congo and Palestine.
- ❖ Students used DevelopmentCheck to monitor 185 infrastructure projects and 232 services for their communities, achieving an average Fix-Rate of 53% of instances where corruption had caused problems in their delivery.
- ❖ The youth demonstrated to themselves and to others that the power to make a positive difference in their lives and their communities that they have the agency to make a difference.
- ❖ Youth are empowered to continue to participate in civil society throughout their lifetimes.
- ❖ Project and service providers expect to be monitored by students, incentivising them to act with integrity and improving the quality of goods they deliver.
- ❖ Even in contexts where the status of girls is low, over 75% of monitors we have trained are female

Integrity Clubs have been integrated into the national civics curriculum and has been made a requirement for all youth in Palestine, as well as being introduced in Kenya where the Ministry of Education, jointly with the country's leading anti-corruption agency and the Kenya Revenue Authority, worked with Integrity Action to introduce this practical approach to the country's schools.
